

SKILLTECH ACADEMY PRESENTS

Vibe Coding Mastery.

AI-Assisted Coding: Build, Ship & Scale Real Apps

One-on-one mentorship that turns beginners into confident builders shipping real, AI-powered apps.

Kenya-Focused • Globally Relevant • 1:1 Mentorship

SKILLTECH ACADEMY ADMISSIONS • CALL 0797931551

Build fast. Ship real apps.

Hands-on Mentorship

Work one-on-one with a mentor who reviews your code, sharpens your projects, and keeps you shipping weekly.

Practical Build Systems

Master AI coding tools, prompts, and workflows measured by the real apps you launch.

Local Ideas, Global Tools

Build for M-Pesa, local SMEs and African markets using world-class AI dev stacks.

Built for people ready to build with AI.

- Beginners who want to build without a CS degree
- Founders prototyping and shipping MVPs fast
- Students creating portfolio-ready projects
- Professionals automating work with AI tools
- Anyone turning app ideas into real products

Not for you if...

- You want to copy-paste without understanding
- You won't build the weekly projects
- You can't commit weekly time to practice
- You expect apps without problem-solving

Ten modules. Idea to shipped app.

01

AI Coding Foundations & Mindset

Understand how AI coding works, set up your tools, and adopt a confident builder's mindset.

02

Prompt-Driven Development

Write effective prompts to generate, edit, and refactor working code with AI assistants.

03

Building Your First App

Turn an idea into a working app, structuring features and pages step by step.

04

Frontend & UI with AI

Design clean, responsive interfaces fast using AI-assisted components and styling.

05

Backend, APIs & Databases

Connect data, build APIs, and store user information securely in real databases.

06

AI Tools, Agents & Automation

Combine AI models, agents, and integrations to automate real workflows.

07

Debugging & Code Quality

Read errors, test features, and refactor AI code into clean, reliable builds.

08

Deployment & Hosting

Ship your app live with hosting, domains, and simple pipelines so real users can access it.

09

Advanced: Scaling & Performance

Optimise speed, handle more users, and structure projects for long-term growth.

10

Advanced: Monetization & Product

Turn your app into a product with payments, M-Pesa, and a clear go-to-market plan.

You don't just learn. You ship.

01 Plan — Pick a real project and map its features with your mentor.

02 Build — Use AI tools to code the app page by page, feature by feature.

03 Ship — Deploy your app live and share it with real users.

04 Iterate — Gather feedback, fix bugs, and add new features.

Every project is mandatory — shipping them is how you graduate.

Choose your pace and depth.

Starter

KES 2,500

- 4 weeks
- Modules 1–4: foundations, prompts, first app, UI
- Best for beginners

RECOMMENDED

Professional

KES 4,000

- 8 weeks
- All 8 core modules incl. backend & deployment
- Best balance of speed and depth

Advanced

KES 6,000

- 12 weeks
- All 10 modules incl. scaling & monetization
- Best for founders & builders

Learn where you work best.

SkillTech Centre

In-person, one-on-one coding mentorship at our centre with full workstation support.

Live Online

Real-time mentorship via video call with shared code and screen sharing — join from anywhere.

Private Location

Your trainer comes to an approved home or office location of your choice.

Sessions: 2–3 per week, 2 hours each, scheduled around you.

Terms: deposit reserves your seat; balance in agreed instalments via M-Pesa or bank.

Earned by shipping, not attendance.

- Complete all mandatory projects
- Pass practical coding assessments
- Ship a live, working app
- Present your project portfolio

Honors: top builders earn Distinction awards, advanced mentorship, and startup incubator access.

Five steps to your first session.

- 01 Submit your application
- 02 Project goals consultation call
- 03 Choose your package and mode
- 04 Pay deposit to secure your spot
- 05 Get assigned your personal mentor

Seats are limited.

Apply early — your deposit locks in your mentor and preferred schedule.

Admissions: 0797931551

Walk out a confident app builder.

- A real app shipped and live
- Fluency with AI coding tools
- Skills to build frontend and backend
- A repeatable deploy workflow
- A portfolio that wins clients and jobs
- Know-how to scale and monetize

Apply today.
